- Platform & Systems Integration
- Stakeholder Management
- Process Automation
- Data-Driven Execution
- Risk & Compliance
- Payments
- HR Tech
- Customer Experience
- Cross-Functional Leadership

PROFESSIONAL EXPERIENCE

Air India	Senior Manager, HR Tech Program Management	MAR 2024 - PRESENT
------------------	---	---------------------------

- Led enterprise HR Tech program management across employee lifecycle platforms (onboarding, attendance, benefits, exits) impacting 30,000+ employees.
- Program-managed Beneficiary go-live across myAI, SuccessFactors, and SkyFam, enabling ₹2.5 Cr recoveries and reducing equivalent annual risk exposure.
- Program-managed Attendance Management System Phase II across myAI, SuccessFactors, Delta Lake, and AMS tool, eliminating 500+ hours/year of manual roster and attendance effort.
- Product-managed ELT Verification Automation, reducing cycle time from 3.0 to 2.2 days, saving 220 hours/year, and delivering ₹8–10L annual efficiency value.
- Drove digitization across key HR workflows including probation, merit-demerit, transfers, promotions/demotions, position changes improving control, compliance, and turnaround time.
- Partnered with HR, Finance, and Technology stakeholders to drive process standardization and policy-aligned system enhancements
- Strengthened data-driven delivery and QA governance, using metrics and reporting frameworks to reduce post-go-live defects to <2%.
- Owned evaluation of 5+ HR Tech tools across BRE, LMS, Attendance & Roster Management, Hiring Experience, and Exit Clearance, supporting vendor selection and procurement decisions.
- Shaped the Agentic AI transformation program by structuring priority L0/L1 processes, building solution and ROI views, and securing alignment from CHRO and CDTO on prioritized scope.
- Defined program metrics, dashboards, and reporting frameworks to track delivery performance, risks, and business impact

AI Systems Project (Independent)	WhatsApp-based Inventory Automation	NOV 2025 - MAR 2026
---	--	----------------------------

- Built a multilingual WhatsApp-based inventory system using LLM workflows to convert natural language inputs into structured inventory actions
- Designed prompt + parsing pipeline (LLM + regex + fallback logic) for reliable handling of low-resource language inputs

- Integrated APIs (Twilio, Airtable) with caching and normalization layers to ensure low-latency, consistent responses
- Deployed serverless architecture for real-time conversational workflows

Paytm **Deputy General Manager, Program Management** **MAR 2022 – FEB 2024**

- Led Core Payments Platform migration, delivering 12% cost savings and enabling scale to 10K TPS.
- Orchestrated cross-functional delivery across 150+ engineers, PMs, and TPMs for high-priority payments programs
- Built governance cadences that improved roadmap quality from 75% to 95%.

CARS24 **General Manager, Customer Experience** **FEB 2021 – FEB 2022**

- Built and scaled CX programs across warranty, returns, and RC transfer workflows
- Automated customer journeys in collaboration with Product and Engineering teams
- Implemented multi-channel communication workflows (Zendesk, WhatsApp, Email)
- Defined NPS frameworks and customer feedback loops

Amazon **Program Manager II** **APR 2018 – JAN 2021**

- Led CX and operations programs across Large Appliances category, coordinating workflows across supply chain, contact centers, and support operations
- Reduced customer contacts per unit (CPU) by 222 bps YoY, saving ₹18.5L annually
- Delivered chatbot and self-service programs reducing contact volume by 47K+ annually
- Improved operational quality by reducing DPMO by 54% annually
- Drove process standardization and workflow improvements across multiple operational teams, improving efficiency and reducing defects

EXL Inductis **Senior Business (Data) Analyst** **JUN 2014 – APR 2016**

- Developed fraud detection strategy reducing client costs by \$1M
- Automated reporting workflows saving 200+ hours annually
