PROFESSIONAL EXPERIENCE

- | | | |
|--|---|----------------------------|
| Payoneer | HR Program Manager | SEP 2026 - PRESENT |
| <ul style="list-style-type: none">• Lead cross-functional People programs, partnering initially with Total Rewards and supporting broader People-team priorities through structured planning, governance, and stakeholder alignment.• Program-manage the 2026-27 year-end performance and compensation cycle across strategy, eligibility, budgeting, SuccessFactors data readiness, Pave configuration, UAT, approvals, implementation, and closure.• Established program controls including RAID, decision and change-control logs, ownership mapping, escalation paths, and milestone governance.• Support Job Architecture Phase 2 and global market-pricing planning while exploring governed AI-assisted HR workflows. | | |
| Air India | Senior Manager, HR Tech Program Management | MAR 2024 - SEP 2026 |
| <ul style="list-style-type: none">• Led enterprise HR technology program management across employee lifecycle platforms, including onboarding, attendance, benefits, payroll, and exits, serving 30,000+ employees.• Led organization-wide implementation of an Attendance, Shift and Roster Management platform, coordinating multiple API integrations, data flows, testing, change readiness, and cross-functional execution for a seamless 1 October 2026 launch.• Drove end-to-end payroll automation for domestic and international employees, spanning requirements, process standardization, integrations, validation, exception handling, controls, and deployment readiness.• Program-managed Beneficiary go-live across myAI, SuccessFactors, and SkyFam, enabling INR 2.5 Cr recoveries and reducing equivalent annual risk exposure.• Product-managed ELT Verification Automation, reducing cycle time from 3.0 to 2.2 days, saving 220 hours annually, and delivering INR 8-10L annual efficiency value.• Digitized HR workflows including probation, merit-demerit, transfers, promotions/demotions, and position changes, improving control, compliance, and turnaround time.• Strengthened QA and delivery governance through metrics and reporting frameworks, reducing post-go-live defects to below 2%.• Evaluated 5+ HR technology solutions across BRE, LMS, attendance and roster management, hiring experience, and exit clearance to support vendor and procurement decisions.• Shaped the Agentic AI transformation program by structuring priority L0/L1 processes, building solution and ROI views, and securing alignment from CHRO and CDTO on prioritized scope.• Defined program metrics, dashboards, and reporting frameworks to track delivery performance, risks, and business impact. | | |
| Paytm | Deputy General Manager, Program Management | MAR 2022 - FEB 2024 |
| <ul style="list-style-type: none">• Led Core Payments Platform migration, delivering 12% cost savings and enabling scale to 10K transactions per second.• Orchestrated cross-functional delivery across 150+ engineers, product managers, and technical program managers for high-priority payments programs.• Built governance cadences that improved roadmap quality from 75% to 95%, strengthening milestone tracking, dependency visibility, and execution discipline.• Coordinated large-scale platform transformation across business, product, engineering, and operations stakeholders in a high-volume payments environment.• Drove structured program reporting and risk management to support leadership decisions and timely resolution of cross-team blockers. | | |

CARS24	General Manager, Customer Experience	FEB 2021 - FEB 2022
• Built and scaled customer-experience programs across warranty, returns, and RC transfer workflows. • Automated customer journeys with Product and Engineering and implemented multi-channel workflows across Zendesk, WhatsApp, and email. • Defined NPS frameworks and customer-feedback loops to improve service quality and decision-making.		
Amazon	Program Manager II	APR 2018 - JAN 2021
• Led customer-experience and operations programs across the Large Appliances category, coordinating workflows across supply chain, contact centers, and support operations. • Reduced customer contacts per unit by 222 bps year over year, saving INR 18.5L annually. • Delivered chatbot and self-service programs that reduced contact volume by more than 47K annually. • Improved operational quality by reducing DPMO by 54% annually. • Drove process standardization and workflow improvements across multiple operational teams, improving efficiency and reducing defects.		
EXL Inductis	Senior Business (Data) Analyst	JUN 2014 - APR 2016
• Developed a fraud-detection strategy that reduced client costs by USD 1M and automated reporting workflows saving 200+ hours annually.		

SELECTED AI PROJECT

Independent	WhatsApp-based Inventory Automation	NOV 2025 - MAR 2026
• Built a multilingual WhatsApp inventory system using LLM workflows to convert natural-language inputs into structured inventory actions. • Designed prompt, parsing, regex, and fallback logic; integrated Twilio and Airtable APIs; deployed a serverless architecture for real-time workflows.
